AERLOR / OPERATIONS TOOLKIT

Plan a useful pilot.

Use this working toolkit after the product and market approvals are ready. The goal is a better purchasing decision—not a marketing claim from a small sample.

1. Define the trial

Property / room category _____

Pilot owner / team _____

Room count / locations _____

Trial dates _____

Product / sample reference _____

2. Record the baseline

What do guests use today? Where is it placed? What do they request or complain about? What does the team spend time cleaning, explaining or replacing?

> **Set acceptance criteria before the results**
>
> Agree the minimum safety, usability, operational and commercial requirements in advance. Record what would make the team continue, revise or stop.

BEFORE A GUEST TOUCHES THE PRODUCT

Before the guest trial.

- [ ] Exact production or trial model is identified and matches its supporting documentation.
- [ ] Engineering has accepted the market, voltage, plug and installation/location suitability.
- [ ] Any temperature, shutoff or heat-rest feature used in the safety plan has been verified.
- [ ] Clear guest instructions are available in the appropriate language and format.
- [ ] Housekeeping has the approved cleaning, cooling, storage and inspection instructions.
- [ ] The placement avoids unsafe routing, unstable surfaces or unsuitable wet-area use.
- [ ] A fault-reporting, removal-from-service and replacement process is in place.
- [ ] For lending tools: checkout, return, cooling and inspection responsibilities are assigned.
- [ ] Staff know the pilot’s purpose, dates and feedback collection process.
- [ ] The property has approved the pilot under its own risk and procurement procedures.

Engineering approval _____

Housekeeping approval _____

Operations approval _____

> **Stop conditions**
>
> Remove a unit from use if a safety concern arises. Guest satisfaction is not a substitute for safety approval. Escalate through the property’s incident process.

A SHORT, NON-LEADING QUESTIONNAIRE

Guest feedback.

Optional feedback. Do not collect unnecessary personal details. Use the property's privacy procedure and explain how responses will be used.

I could find and understand the amenity without help.

○ 1 ○ 2 ○ 3 ○ 4 ○ 5 ○ N/A

The position and setup were comfortable for my routine.

○ 1 ○ 2 ○ 3 ○ 4 ○ 5 ○ N/A

The amenity met the needs I had during this stay.

○ 1 ○ 2 ○ 3 ○ 4 ○ 5 ○ N/A

The appearance felt consistent with the room.

○ 1 ○ 2 ○ 3 ○ 4 ○ 5 ○ N/A

1 = Strongly disagree · 2 = Disagree · 3 = Neither · 4 = Agree · 5 = Strongly agree · N/A = Not used / not applicable

Your comments matter as much as the rating.

Use the next page to tell us what worked, what could improve and whether something was missing from your getting-ready routine.

These questions are a proposed pilot instrument, not a validated satisfaction scale. Do not turn the responses into a causal revenue claim.

IN YOUR OWN WORDS

Guest comments.

Optional comments. Please do not include your name, room number or other personal information unless the property specifically asks for it under its privacy procedure.

What worked well?

What would make it more useful?

Did you need something else?

Thank you for helping the property understand how the room works for real routines.

PUT THE GUEST RESPONSE IN CONTEXT

Staff review and decision.

MEASURE	BASELINE	PILOT OBSERVATION
Guest responses / response rate	_____	_____
Amenity or assistance requests	_____	_____
Faults / removals from service	_____	_____
Cleaning / handling time	_____	_____
Lending demand / return checks	_____	_____
Spare or replacement requirements	_____	_____

Interpret before deciding

Record room mix, occupancy, timing, participation and any changes besides the amenity. A positive response is useful feedback; it does not by itself prove incremental revenue, loyalty or retention.

- ☐ Continue: agreed safety, operational and commercial criteria are met.
- ☐ Revise: address specific product, placement or service issues before expanding.
- ☐ Stop: the pilot does not meet the room standard or required safeguards.

Decision / conditions _____

Responsible owner _____

Next review date _____
