THE PROCUREMENT GUIDE

Procurement, properly specified.

Bring design, engineering, operations and purchasing into one useful conversation.

GUESTROOM TECHNOLOGY / LITE & PREMIUM

BEFORE YOU COMPARE THE QUOTE

Define the requirement.

A product name alone is not a specification. Use this matrix to align the people responsible for the purchase and the guest experience.

DECISION	WHAT TO RECORD	PRIMARY REVIEWER
Guest use	Routine, room category, in-room or on-request service	Operations
Placement	Reach, light, outlet, cable, storage and cleaning access	Design + engineering
Exact model	Model code, revision, finish and approved sample identity	Purchasing
Electrical fit	Destination market, voltage, plug and applicable approval evidence	Engineering
Performance	Relevant measurements and the conditions under which they were tested	Engineering + operations
Care	Approved cleaning, cooling, storage and inspection process	Housekeeping
Support	Hotel-use warranty, replacement route, spares and documentation	Purchasing + operations

> **Treat status labels literally**
>
> Defined identifies the collection concept. Proposed describes a design intention. Unverified means the technical evidence has not been established. None of these labels is a certification.

A QUOTE YOU CAN ACTUALLY COMPARE

Compare the complete offer.

- [ ] Exact product, finish, electrical configuration and included accessories
- [ ] Unit quantities and any spare pool, stated separately
- [ ] Currency, unit prices and the basis for any volume pricing
- [ ] Taxes, freight, duties and destination responsibilities where applicable
- [ ] Payment schedule, quotation validity and order-acceptance terms
- [ ] Agreed production and delivery timing, with dependencies stated
- [ ] Warranty scope, service process and replacement arrangements
- [ ] Any customisation, packaging, artwork or sample charges

> **Compare like with like**
>
> A low unit price is not comparable to a complete landed and supported offer unless the included costs and obligations match. Do not infer an approval, accessory, warranty or delivery date from a generic catalogue description.

For multiple destinations, separate the electrical configurations and delivery responsibilities. A common visual design does not establish one universal international approval.

A CLEAR COMMERCIAL HANDOFF

From selection to order.

01

Project bag

A planning selection of products, finishes and quantities. It is not stock allocation or an order.

02

Project inquiry

A request to discuss requirements. An email draft is not sent until you send it. Direct submission must return a real delivery reference.

03

Written quotation

The product configuration, scope, pricing, delivery and applicable commercial terms should be explicit.

04

Approved checkout

Only released, priced and eligible configurations can proceed to payment. Card details belong on the payment provider’s hosted checkout.

05

Payment and fulfillment

Payment must be verified with the provider. A success-page visit is not proof of payment, and payment confirmation is not shipping confirmation.

> **Current collection status**
>
> AERLOR is in development. Pricing, market approval, availability and service commitments require confirmation before a commercial order can be accepted.

KEEP THE DECISION WITH THE SPECIFICATION

Keep the approval record.

Property / program _____

Destination market _____

Product / model / revision _____

Approved sample reference _____

Quantity / spare pool _____

Quote reference / currency _____

Target delivery window _____

- [ ] Engineering has reviewed the exact-model electrical and safety evidence.
- [ ] Housekeeping has accepted the cleaning, storage and inspection routine.
- [ ] Operations has approved placement, guest instructions and service ownership.
- [ ] Purchasing has confirmed the complete commercial and support terms.

Approved by / role _____

Date / next review _____

This is a planning record, not a compliance certificate or a substitute for the property's approval procedure. Keep supporting evidence attached.
